

ACOUSTIC MOSS PANELS

Acoustic panels never looked so stunning with surfaces covered in colored, preserved reindeer moss. We use high performing .90 NRC acoustic fiberglass panels behind the moss surface to achieve maximum quality sound absorption. Our proprietary moss preservation technique guarantees the moss will keep its original appearance. It will never dry or flake off! If you love the look, but don't need the acoustic features, we offer the full line with just the framed moss panels.

DIMENSIONS

14"L x 48"H x 2"D

WEIGHT

15 lbs each
